

# Creating a Custom Connector with Visual Studio 2017

**Setup Time:** 60 minutes

**Lab Folder:** C:\Student\Modules\11\_CustomConnectors\Lab

**Overview:**

## Exercise 1: Create a New App Workspace and Populate It with Content

In this exercise, you will create a new app workspace and then you will work to populate the workspace with content which will include a dataset, a report and a dashboard.

1. Make sure you are logged into the Power BI service with your primary user account.
2. Create a new app workspace named **Embedded Lab**.

3. xxx
